Contract Number: GS-10F-0019W

Contract Period: October 20, 2009 through October 19, 2014

Business Size: Small

Federal Supply Group: 899

Industrial Class: F999

For more information on ordering from Federal Supply Schedules click on the FSS Schedules button at <http://www.gsa.gov>

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!, a menu-driven database system. The INTERNET address for GSA Advantage! is: <http://www.GSAAdvantage.gov>

Galli Engineering, P.C.

The knowledge and expertise to manage and solve today's environmental issues

Galli Engineering is a company of engineers and scientists, providing municipalities, industries, and commercial entities with quality environmental engineering services to solve today's environmental problems.

Galli Engineering, provides expertise and service in the management and permitting of solid, industrial, hazardous and infectious wastes; noise and air quality studies; soils and groundwater investigations; environmental sciences; civil and site engineering; and sanitary and industrial wastewater disposal systems.

Our approach starts with an initial consultation to determine your specific needs and desired end results. Based on this information we will tailor a package which will ensure meeting your regulatory objective at a reasonable cost.

Technical Expertise

Galli Engineering's engineers and scientists are experienced in all disciplines pertinent to assessing and solving environmental issues. The company offers expertise in:

- Environmental Assessment (EA) and Environmental Impact Statement (EIS) preparation under the National Environmental Policy Act (NEPA);
- Endangered species, wetland, watershed, and other natural resource management plans; Archeological and/or cultural resource management plans;
- Economic, technical and/or risk analysis; other environmentally related studies and/or consultations;
- Permitting; Spill prevention/control and countermeasure plans;
- Pollution prevention surveys; and Community Right to-Know Act reporting. Advisory Services for ongoing advice and assistance with data and information in support of agency environmental programs involving areas such as Hazardous material spills;
- Waste Management Consulting Services to provide guidance in support of waste-related data collection, feasibility studies and risk analyses;
- Resource Conservation and Recovery Act/Comprehensive Environmental Response Compensation and Liability Act (RCRA/CERCLA) site investigations;
- Hazardous and/or non-hazardous exposure assessments; Waste characterization and source reduction studies; and
- Review and recommendation of waste tracking or handling systems; Waste management plans and/or surveys; Waste minimization/pollution prevention initiatives.

CUSTOMER INFORMATION

1a. Special Item Numbers (SIN)s

This Contract covers the following Special Item Numbers (SINs), as fully described in this Schedule Price List:

- SIN 899-1 and 899-1RC – Environmental Consulting Services (See Page 17)

1b. Identification of Lowest Unit Price

Galli Engineering, P.C. prices, (see Services Price List), is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price.

1c. The Contractor is proposing hourly rates.

A description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services is provided.

2. Maximum Order

The Contractor is not obligated to honor any order of a combination of items in the excess of:

ITEM NUMBER/SIN	MAXIMUM ORDER
All Items	\$1,000,000.

3. Minimum Order

When the Government requires supplies or services covered by this Contract in an amount less than \$100, the Government is not obligated to purchase, nor is the Contractor obligated to furnish those supplies or services under the Contract.

4. Geographic Coverage (Delivery Area)

Galli Engineering, PC will provide domestic delivery. **Domestic delivery** is delivery within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, and Washington, DC; and to a Continental United States port or consolidation point for orders received from overseas activities.

5. Point(s) of Production (City, County, and State of Foreign Country)

Same as company address.

6. Discount from List Prices or Statement of Net Price

Government net prices (discounts already deducted). See Attachment.

7. Quantity Discounts

None offered:

8. Prompt Payment Terms

Prompt payment discount terms: Net 30 days.

9a. Government Purchase Cards up to the Micro-Purchase Threshold

Galli Engineering, PC will accept the Government purchase card for payments equal to or less than the micro-purchase threshold for oral or written delivery/task orders.

9b. Government Purchase Cards above the Micro-Purchase Threshold

Galli Engineering, PC will accept the Government purchase card for payments above \$2,500.

10. Foreign Items

Galli Engineering, PC does not offer any foreign items in this Schedule.

11a. Time of Delivery

Galli Engineering, PC will adhere to the time of delivery determined for each separate delivery/task order placed under this Schedule.

11b. Expedited Delivery

Galli Engineering, PC will provide expedited delivery of a delivery/task order subject to the availability of resources, the scope of work requested, and after an evaluation of financial impact, may require additional funding to accomplish expedited delivery.

11c. Overnight and 2-day Delivery

Overnight/2-day delivery will be negotiated on a case-by-case basis. If the ordering agency requests overnight/2-day delivery or if the delivery/task order specifies overnight/2-day delivery, please contact Galli Engineering, PC.

11d. Urgent Requirements

When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering agency, agencies are encouraged, if time permits, to contact the Contractor for the purpose of obtaining accelerated delivery.

12. F.O.B. Point(s)

The Freight on Board point is Destination.

13a. Ordering Address(es)

For orders by facsimile transmission:

Galli Engineering, PC
Fax Number: 631-271-9345

For mailed orders:

Galli Engineering, PC
734 Walt Whitman Road
Suite 402A
Melville, New York 11747

The following telephone number can be used by ordering agencies to obtain technical and/or ordering assistance: 631-271-9292.

13b. Ordering Procedures

For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's), and a sample BPA can be found at the GSA/FSS Schedule homepage (fss.gsa.gov/schedules). .

14. Payment Address

Via Mail or Federal Express
Galli Engineering, PC 734 Walt Whitman Road Suite 402A Melville, New York 11747

15. Warranty Provision

Galli Engineering, PC warrants that the services provided will satisfy the requirements of the delivery/task orders obtained under this Schedule.

16. Export Packaging Charges

Not applicable under this Schedule.

17. Terms and Conditions of Government Purchase Card Acceptance

Galli Engineering, PC will accept the Government purchase card for payments above and below the micro-purchase threshold for oral or written delivery/task orders.

18. Terms and Conditions of Rental, Maintenance, and Repair

Not applicable under this Schedule.

19. Terms and Conditions of Installations

Not applicable under this Schedule.

20. Terms and Conditions of Repair Parts

Not applicable under this Schedule.

20a. Terms and Conditions for any Other Services

Not applicable under this Schedule.

21. List of Service and Distribution Points

Not applicable under this Schedule.

22. List of Participating Dealers

Not applicable under this Schedule.

23. Preventive Maintenance

Not applicable under this Schedule.

24a. Environmental Attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants

Not applicable under this Schedule..

24b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contactor's website or other location.)

The EIT standards can be found at: www.Section508.gov/.

25. Data Universal Number System (DUNS) Number

Galli Engineering, PC DUNS number is: 809665557.

26. Central Contractor Registration (CCR) Database

Galli Engineering, PC is registered with the Central Contractor Registration (CCR) and is CCR compliant.

Labor Category Descriptions

Project Principal (P.E.)

Minimum/General Experience: This is a specific subject matter specialist. This position requires a minimum of fifteen (15) years of general environmental Science/analytical experience including eight (8) years direct, specialized experience in the Specific Subject Matter Area. Specialized experience includes demonstrated experience in environmental/analytical area specifically relevant to the order's tasks. Incumbent must have served as a project manager in directly related experience areas. Functional Responsibilities: Applying current disciplines and methodologies to the planning, analysis, evaluation, design, development, implementation, and/or support of environmental/analytical projects (planning services and documentation, compliance services, occupational training services, waste management services and software, and/or Geographic Information Systems (GIS)). Also, responsible for establishing and enforcing technical approaches and standards in the environmental/analytical process, and the application of automated support tools.

Minimum Education: Master's degree from an accredited college or university which provides substantial knowledge of the environmental sciences. Degrees may emphasize Environmental Science, Biological Science, Physical Science, Computer Science, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Materials Science Engineering, Agricultural Engineering, Computer/Software Engineering, Environmental Engineering, Systems Engineering and other engineering or scientific disciplines and/or Business Administration.

Incumbent must be a licensed Professional Engineer.

Education and experience requirements may be substituted with:

1. Six (6) years of additional direct relevant experience or a Bachelor's degree with two (2) years of additional direct relevant experience may be substituted for a Master's degree.
2. A PhD may be substituted for two (2) years of experience.

Principal Project Manager

Minimum/General Experience: This is a specific subject matter specialist. This position requires a minimum of ten (10) years of general environmental science/analytical experience including six (6) years direct, specialized experience in the Specific Subject Matter Area. Specialized experience includes demonstrated experience in environmental/analytical area specifically relevant to the order's tasks. Incumbent must have served as a project manager in directly related experience areas.

Functional Responsibilities: Applying current disciplines and methodologies to the planning, analysis, evaluation, design, development, implementation, and/or support of

environmental/analytical projects. Also, responsible for establishing and enforcing technical approaches and standards in the environmental/analytical process, and the application of automated support tools.

Minimum Education: Bachelor's degree from an accredited college or university which provides substantial knowledge of the environmental sciences. Degrees may emphasize Environmental Science, Biological Science, Physical Science, Computer Science, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Materials Science Engineering, Agricultural Engineering, Computer/Software Engineering, Environmental Engineering, Systems Engineering and other engineering or scientific disciplines and/or Business Administration.

Education and experience requirements may be substituted with: Four (4) years of additional direct relevant experience.

Project Manager

Minimum/General Experience: This is a specific subject matter specialist. This position requires a minimum of five (5) years of general environmental science/analytical experience including 3 (3) years direct, specialized experience in the Specific Subject Matter Area. Specialized experience includes demonstrated experience in environmental/analytical area specifically relevant to the order's tasks. Incumbent must have served as a project manager in directly related experience areas.

Functional Responsibilities: Applying current disciplines and methodologies to the planning, analysis, evaluation, design, development, implementation, and/or support of environmental/analytical projects. Also, responsible for establishing and enforcing technical approaches and standards in the environmental/analytical process, and the application of automated support tools.

Minimum Education: Bachelor's degree from an accredited college or university which provides substantial knowledge of the environmental sciences. Degrees may emphasize Environmental Science, Biological Science, Physical Science, Computer Science, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Materials Science Engineering, Agricultural Engineering, Computer/Software Engineering, Environmental Engineering, Systems Engineering and other engineering or scientific disciplines and/or Business Administration.

Education and experience requirements may be substituted with: Four (4) years of additional direct relevant experience.

Project Engineer

Minimum/General Experience: This is a specific subject matter specialist. This position requires a minimum of five (5) years of general environmental science/analytical experience including 3 (3) years direct, specialized experience in the Specific Subject Matter Area. Specialized experience includes demonstrated experience in environmental/analytical area specifically relevant to the order's tasks.

Functional Responsibilities: Applying current disciplines and methodologies to the planning, analysis, evaluation, design, development, implementation, and/or support of environmental/analytical projects. Also, responsible for establishing and enforcing technical approaches and standards in the environmental/analytical process, and the application of automated support tools.

Minimum Education: Bachelor's degree from an accredited college or university which provides substantial knowledge of the environmental sciences. Degrees may emphasize Environmental Science, Biological Science, Physical Science, Computer Science, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Materials Science Engineering, Agricultural Engineering, Computer/Software Engineering, Environmental Engineering, Systems Engineering and other engineering or scientific disciplines and/or Business Administration.

Education and experience requirements may be substituted with: Four (4) years of additional direct relevant experience.

Senior Engineer

Minimum/General Experience: This is a specific subject matter specialist. This position requires a minimum of five (5) years of general environmental science/analytical experience including 3 (3) years direct, specialized experience in the Specific Subject Matter Area. Specialized experience includes demonstrated experience in environmental/analytical area specifically relevant to the order's tasks.

Functional Responsibilities: Applying current disciplines and methodologies to the planning, analysis, evaluation, design, development, implementation, and/or support of environmental/analytical projects. Also, responsible for establishing and enforcing technical approaches and standards in the environmental/analytical process, and the application of automated support tools.

Minimum Education: Bachelor's degree from an accredited college or university which provides substantial knowledge of the environmental sciences. Degrees may emphasize Environmental Science, Biological Science, Physical Science, Computer Science, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Materials Science Engineering, Agricultural Engineering, Computer/Software Engineering, Environmental Engineering, Systems Engineering and other engineering or scientific disciplines and/or Business Administration.

Education and experience requirements may be substituted with: three (3) years of additional direct relevant experience.

Engineer

Minimum/General Experience: This position requires a minimum of one (1) year of general environmental science/analytical experience.

Functional Responsibilities: Applying current disciplines and methodologies to the planning, analysis, evaluation, design, development, implementation, and/or support of environmental/analytical projects. Also, responsible for establishing and enforcing technical approaches and standards in the environmental/analytical process, and the application of automated support tools.

Minimum Education: Bachelor's degree from an accredited college or university which provides substantial knowledge of the environmental sciences. Degrees may emphasize Environmental Science, Biological Science, Physical Science, Computer Science, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Materials Science Engineering, Agricultural Engineering, Computer/Software Engineering, Environmental Engineering, Systems Engineering and other engineering or scientific disciplines and/or Business Administration.

Senior Draftsman

- BA/BS degree
- 3 years of applicable experience
- Utilizes AutoCad to prepare site maps, geological cross sections, and engineering plans
- Interprets information from recorded maps, land grants, deeds, and other documents
- Generates reports, maps, diagrams, and exhibits, on related printing/plotting equipment
- Selects cartographic elements and develops effective presentations of information

Draftsman

- BA/BS degree
- 1 year of applicable experience
- Utilizes AutoCad to prepare site maps, geological cross sections, and engineering plans
- Interprets information from recorded maps, land grants, deeds, and other documents
- Generates reports, maps, diagrams, and exhibits, on related printing/plotting equipment
- Selects cartographic elements and develops effective presentations of information

Party Chief

Minimum/General Experience: This is a specific subject matter specialist. This position requires a minimum of three (3) years of general environmental science/analytical experience including one (1) year direct, specialized experience in the Specific Subject Matter Area. Specialized

experience includes demonstrated experience in environmental/analytical area specifically relevant to the order's tasks. Incumbent must have served as a team leader in directly related experience areas.

Functional Responsibilities: Applying current disciplines and methodologies to the planning, analysis, evaluation, design, development, implementation, and support of environmental/analytical projects (planning services and documentation, compliance services, occupational training services, waste management services and software, and/or GIS). Incumbent is responsible for enforcing technical approaches and standards in the environmental/analytical process, and the application of automated support tools.

Minimum Education: Bachelor's degree from an accredited college or university which provides substantial knowledge of the environmental sciences. Degrees may emphasize Environmental Science, Biological Science, Physical Science, Computer Science, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Materials Science Engineering, Agricultural Engineering, Computer/Software Engineering, Environmental Engineering, Systems Engineering and other engineering or scientific disciplines and/or Business Administration.

Education and experience requirements may be substituted with:

1. Four (4) years of additional direct relevant experience may be substituted for a Bachelor's degree.
2. A Master's degree may be substituted for two (2) years of experience.
3. A PhD may be substituted for four (4) years of experience.

Surveyor

Supervises and performs land surveying duties in directing technicians on specific projects under minimal supervision of project manager. Provides field and laboratory services, including testing and inspection of concrete, asphalt, and soil.

Minimum Requirements: Bachelor's Degree in Surveying Technology or equivalent and two years of experience or 4 years of acceptable land surveying experience

Senior Environmental Planner

Under the direction of a program manager or department head, applies full competency in conventional planning work and broad knowledge of precedents in functional area of assignment. Plans, schedules, conducts or coordinates detailed phases of planning assignments in a part of a major project or in a total project of moderate scope. Work may involve land utilization, urban planning, transportation or archaeological projects. Coordinates technical work requirements of planning projects. Provides guidance to more junior planners in

the design and preparation of plans and technical reports, and in the preparation of graphics, proposals, contracts, scopes of work and feasibility studies. Conducts analyses to determine impact of proposed project. Designs and formulates plans in graphic or written format. Writes project proposal components. Assists in the management of projects and acts as project manager on specific project tasks.

Senior Planner

Research and write sections of environmental compliance documents with moderate oversight by a Project Manager or Senior Project Manager. May work as an assistant to Project Managers or Senior Project Managers on more complex assignments.

Minimum Education:

A Bachelor's degree in science, engineering, government, planning, or policy or an equivalent combination of education and practical experience is required.

Minimum Experience Requirements:

Must have at least three years experience producing written analysis of environmental issues

Regulatory Consultant

Functional Duties/Responsibilities:

Direct the preparation of permit application packages, typically in compliance with the federal Clean Water Act, California Fish and Game Code, and applicable local laws and regulations.

Minimum Education:

A Bachelor's degree in science or geography or an equivalent combination of education and practical experience is required.

Minimum Experience Requirements:

Must have five years experience preparing environmental permit applications.

Senior Scientist

Manage complex biological resource investigations that require an expert understanding of local and regional biological resources, including specific expertise in the identification of sensitive wildlife species, rare plants, and/or the delineation of wetlands, streambeds and Waters of the U.S. pursuant to applicable laws (e.g., Clean Water Act) and regulations (e.g., U.S. Army Corps

of Engineers guidance). Prepare survey reports, habitat restoration plans, and other biology technical reports.

Advise clients on strategies for compliance with the Endangered Species Act, Clean Water Act, and other federal, state, and local laws and regulations that protect biological resources. Help train in-house staff and others in the identification of sensitive plant or wildlife species and/or in the assessment of sensitive biological communities (habitat types). Prepare proposals, participate in interviews, develop business opportunities.

Minimum Education:

A Bachelor's degree in science or geography or an equivalent combination of education and practical experience is required.

Minimum Experience Requirements:

Must have twelve years experience conducting biological resource investigations and helping clients to comply with laws and regulations that protect biological resources.

Project Scientist

Manage complex biological resource investigations that require an expert understanding of local and regional biological resources, including specific expertise in the identification of sensitive wildlife species, rare plants, and/or the delineation of wetlands, streambeds and Waters of the U.S. pursuant to applicable laws (e.g., Clean Water Act) and regulations (e.g., U.S. Army Corps of Engineers guidance). Prepare survey reports, habitat restoration plans, and other biology technical reports.

Advise clients on strategies for compliance with the Endangered Species Act, Clean Water Act, and other federal, state, and local laws and regulations that protect biological resources. Help train in-house staff and others in the identification of sensitive plant or wildlife species and/or in the assessment of sensitive biological communities (habitat types). Prepare proposals, participate in interviews, develop business opportunities.

Minimum Education:

A Bachelor's degree in science or geography or an equivalent combination of education and practical experience is required.

Minimum Experience Requirements:

Must have twelve years experience conducting biological resource investigations and helping clients to comply with laws and regulations that protect biological resources.

EM Technician

- BA/BS degree in geology, engineering, or related science
- 10 years of applicable experience
- Oversees operation of groundwater pump-and-treat and soil vapor extraction systems
- Supervises field collection of soil and groundwater samples
- Screens assignments for unusual problems and selects procedures to be applied
- Designs and implements geophysical and geochemical surveys to characterize subsurface conditions.
- Performs geophysical studies for landfill investigations, detecting buried drums and tanks, buried debris and unknown subsurface structures using gravity, magnetic and two-dimensional seismic profiling.
- Evaluates subsurface conditions and proposes remedial actions, generates tank closure and remedial action reports, and oversees tank testing and new tank installations.
- Interfaces with clients and regulatory officials to coordinate and direct UST closure and site assessment activities.
- Directs and conducts investigations involving the construction of monitoring wells, installation of soil borings and well points, groundwater sampling, and laboratory analysis for hydrogeological and environmental characterization.

Safety Specialist

Education Bachelors/applicable discipline, or equivalent

Minimum Experience 5 years relevant Duty

Description Performs industrial hygiene field measurements, safety measurements, safety evaluations and hazardous waste evaluations. Evaluates and interprets current regulations and assists in compliance. Develops hazardous materials communications. Make recommendations for changes in the work environment based on interpretations and principles of professional practices.

Skill Level 31 – Administrative Assistant – Senior

Minimum/General Experience: This is a support position requiring a minimum of two (2) year's directly relevant business/analytical support experience.

Functional Responsibilities: Providing administrative and other technical support functions assisting technical personnel in the analysis, evaluation, design, development, implementation, and/or support of business/analytical projects. Also, performs analysis, development, and review of program administrative operating plans and procedures.

Minimum Education: Bachelor's degree or equivalent.

Education and experience requirements may be substituted with:

Additional academic work may be substituted for direct experience using a year-to-year equivalence.

Skill Level 32 – Administrative Assistant – Junior

Minimum/General Experience: This is a support position requiring a minimum of one (1) year’s directly relevant business/analytical support experience.

Functional Responsibilities: Providing administrative and other technical support functions assisting technical personnel in the analysis, evaluation, design, development, implementation, and/or support of business/analytical projects.

Minimum Education: Bachelor’s degree or equivalent.

Education and experience requirements may be substituted with:

Additional academic work may be substituted for direct experience using a year-to-year equivalence.

Substitution Clarification

*Substituted years of direct relevant experience to meet degree requirements are in addition to any other general or relevant years of experience called for in the individual skill categories.

** Years of experience substituted for a degree can be either general or specific depending on the relevancy of the degree or field of study to the task to be performed. If loosely related they should be counted as general years of experience. If closely related they may be counted as specific years of experience.

SCA Matrix		
SCA Eligible Contract Labor Category	SCA Equivalent Code - Title	WD Number
Administrative Assistant - Senior	01020 – Administrative Assistant	05-2373
Administrative Assistant - Junior	01020 – Administrative Assistant	05-2373
Environmental Technician	30090 – Environmental Technician	05-2373
<p>The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the SCA Matrix. The prices offered are based on the preponderance of where work is performed and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.</p>		

DESCRIPTION OF SPECIAL ITEM NUMBERS (SINs)

The following are examples of tasks that may be performed under each SIN. These are examples only and are not meant to exclude or limit any authentic environmental service under this Federal Supply Schedule. Examples include but are not limited to the following.

SIN 899-1 – Environmental Consulting Services

- Environmental Assessment (EA) and Environmental Impact Statement (EIS) preparation under the National Environmental Policy Act (NEPA);
- Endangered species, wetland, watershed, and other natural resource management plans; Archeological and/or cultural resource management plans;
- Economic, technical and/or risk analysis; other environmentally related studies and/or consultations;
- Permitting; Spill prevention/control and countermeasure plans;
- Pollution prevention surveys; and Community Right to-Know Act reporting. Advisory Services for ongoing advice and assistance with data and information in support of agency environmental programs involving areas such as Hazardous material spills;
- Waste Management Consulting Services to provide guidance in support of waste-related data collection, feasibility studies and risk analyses;
- Resource Conservation and Recovery Act/Comprehensive Environmental Response Compensation and Liability Act (RCRA/CERCLA) site investigations;
- Hazardous and/or non-hazardous exposure assessments; Waste characterization and source reduction studies; and
- Review and recommendation of waste tracking or handling systems; Waste management plans and/or surveys; Waste minimization/pollution prevention initiatives.
